

MOHAMMED ABDUL RAHEEM

+918106817727 | mdabdulraheem335@gmail.com | [LinkedIn](#) | [GitHub](#)

PROFILE SUMMARY

GenAI developer with experience in LLM-based tools and exposure to cloud fundamentals. Built chatbots, automation utilities, and data analysis tools through virtual programs at AWS, BCG, Accenture, TATA & Deloitte. Skilled in Python, SQL, Tableau, Power BI, & modern AI toolsets. Certified in Oracle Generative AI, AWS Cloud Practitioner, & Oracle Database@AWS Architect.

EDUCATION

Keshav Memorial Institute of Commerce and Science | B.Com (Computer Application) | 2022-2025

Sri Chaitanya Junior College | MEC | 2020-2022

EXPERIENCE

AWS – Solutions Architecture (Virtual Experience Program)

- Designed a simple and scalable web hosting architecture using Elastic Beanstalk.
- Explained cost structure and architecture behaviour in clear, client-friendly documentation.

Boston Consulting Group (BCG) – GenAI (Virtual Experience Program)

- Developed a financial assistant chatbot using LLMs to handle client queries.
- Applied prompt engineering and evaluation to improve AI-driven responses.

TATA & Deloitte – GenAI Data Analytics / Data Analytics (Virtual Experience Program)

- Developed an AI-driven delinquency prediction & anomaly-detection bot for risk & fraud insights.
- Created dashboard reports using Tableau & Python to support analytics & compliance workflows.

SKILLS

GenAI & AI Tools: Prompt Engineering, ChatGPT, Gemini, Claude, Google AI Studio, Amazon Q

Cloud: AWS, Azure & Oracle Fundamentals, DevOps basics

Programming: Python, SQL, C, C++, Java

Data Analytics: EDA, Statistical Analysis, Data Preprocessing

Productivity Tools: MS Office (Excel – Pivot Tables, Charts, PowerPoint, Word), Tableau, Power BI

Web Development: HTML, CSS, JavaScript

PROJECTS

- **CloudBrew AI Coffee Shop** – Built a serverless coffee ordering web app with AI mood recommendations, integrating Lambda functions, API Gateway, and DynamoDB for order processing, deployed on S3 with IAM security policies, CloudWatch monitoring, and cost governance (budgets & alerts) for production-ready infrastructure.
- **AI Data Analyst Platform** - Created a Python + LLM-based tool that performs automated data analysis, produces summaries, and generates visual insights. Worked on data cleaning, exploration, and presenting results in a structured format.
- **AI Call Center Bot** - Developed a Twilio-based voice bot that captures user queries and generates instant responses. Implemented conversation flow, logging, and reporting features.
- **AI Cover Letter Builder** - Developed a simple web tool that creates personalised cover letters from a resume and job description. Focused on prompt design and clean text formatting.
- **Universal File Converter** - Built a document converter that handles formats like PDF, Word, and Text. Included an AI helper for summarising and rewriting content.
- **Problem-Solving Apps with GenAI** - Built SaaS projects to support problem-solving and automation.
